

# Deans Green Paddock

Having a campfire tonight?

Keep these fire safety essentials top of mind to ensure you have a safe trip!

Thanks for doing your part to be safe and prevent bushfires.

*Please Enjoy your time at DGP*

## DO'S

### Ensure fires are currently allowed

Check with your Host & local county to see if fires are currently prohibited for any reason.

### Use a fire ring in a cleared area

Sparks can fly! Make sure they stay away from dry brush and that your fire is contained.

### Fully extinguish the fire with water

Use water until the hissing stops and feel a few inches above the ashes to make sure they are cool.

## DON'TS

### Leave the fire unattended

A gust of wind could cause your fire to get out of control. Being attentive is key!

### Use flammable liquids

Lighter fluid can cause a fire to dangerously flare up and get out of hand.

### Build a large fire

Your fire should always be under control and easy to extinguish at any time.
